AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application. Please amend claims 1, 11 and 12 as follows:

LISTING OF CLAIMS:

1. (Currently Amended) A method of storing information from a mobile communications terminal, the method comprising:

determining a storage location from a plurality of storage locations based on predetermined criteria, the plurality of storage locations including at least one storage location in said terminal and at least one storage location accessible over a mobile communications network; and

storing the information to said storage location.

2. (Original) A method of storing information from a mobile communications terminal, the method comprising:

presenting to a user a list of available storage locations, the available storage locations including at least one storage location in said terminal and at least one storage location accessible over a mobile communications network;

determining a preferred storage location selected by the user; and

storing the information at a used storage location, without informing the user of the used storage location.

3. (Original) A method of storing information from a mobile communications terminal, the method comprising:

presenting to a user a list of available storage locations, the available storage locations including at least one storage location in said terminal and at least one storage location accessible over a mobile communications network;

storing an order of preference of said storage locations, selected by the user; and,

when information is to be stored:

determining a storage location to be used, based on the order of preference selected by the user; and

storing the information at the used storage location, without informing the user of the identity of the used storage location.

4. (Original) A method of storing information from a mobile communications terminal, the method comprising:

presenting to a user a list of available storage locations, the available storage

locations including at least one storage location in said terminal and at least one

storage location accessible over a mobile communications network;

determining a preferred storage location selected by the user; and

storing the information at a used storage location, without informing the user

of the used storage location.

5. (Original) A method as claimed in claim 4, comprising:

storing the information at a first preferred storage location selected by the

user, if sufficient storage is available there; and

storing the information at a second preferred storage location selected by the

user, if insufficient storage is available at the first preferred storage location.

6. (Original) A method of storing information from a mobile communications

terminal, the method comprising:

selecting a storage location from a list including at least one storage location

in said terminal and at least one storage location accessible over a mobile

communications network, the selection being made in accordance with

predetermined criteria; and

storing the information at the selected storage location.

7. (Original) A method of storing information from a mobile communications terminal, the method comprising:

presenting to a user a list of available storage locations, the available storage locations including at least one storage location and in said terminal and at least one storage location accessible over a mobile communications network;

storing the information at a first preferred storage location selected by the user, if sufficient storage is available there; and

storing the information at a second preferred storage location selected by the user, if insufficient storage is available at the first preferred storage location.

8. (Original) A method of retrieving information to a mobile communications terminal, the method comprising:

presenting to a user a list of available data items, the available data items including at least one data item stored at a storage location in said terminal and at least one data item stored at a storage location accessible over a mobile communications network.

9. (Original) A method of retrieving information as claimed in claim 8, comprising presenting the list of available data items, without informing the user of their respective storage locations.

VA 269703.1

10. (Original) A method of retrieving information as claimed in claim 8, comprising presenting the list of available data items, together with an indication of their respective storage locations.

11. (Currently Amended) A method of retrieving information as claimed in claim 8, wherein the user can retrieve stored data, without specifying whether the data is stored on the mobile communications device, or on a storage medium connected thereto, or at ~~the~~ a remote storage device.

12. (Currently Amended) A method of retrieving information as claimed in claim 8, wherein the user is presented with a list of stored data items, including items stored by the user, and items stored on [[the]] a remote storage device, the items stored centrally on the remote storage device being accessible by multiple users.

13. (Original) A method of retrieving information to a mobile communications terminal, the method comprising:

presenting to a user a list of available data items, the available data items including at least one data item stored by the user, and at least one data item stored by a central source and accessible by multiple users.

14. (Original) A method of retrieving information as claimed in claim 13, wherein the list does not indicate the source of the data items.

15. (Previously Presented) A mobile communications device, adapted to store information in accordance with a method as claimed in claim 1.

16. (Original) A mobile communications device as claimed in claim 15, in the form of a mobile phone.

17. (Previously Presented) A mobile communications device, adapted to retrieve information in accordance with a method as claimed in claim 1.

18. (Original) A mobile communications device as claimed in claim 17, in the form of a mobile phone.
